DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 13 February 2009 has been entered.

REASONS FOR ALLOWANCE

2. Claims 1-8, 10-12, 14, 16-18 and 21-25 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claim 1, the prior art does not teach or fairly suggest a method including selecting first image data for one of time periods of a first heart cycle and selecting second image data for one of time periods of a second heart cycle, first and second image data correspond to a same sub-region of the heart and a similarity measure applied to intermediate images generated therefrom is minimized, when taken in combination with the other limitations of the claim. Claims 2-8, 10, 12, 14, 16-18 and 21 are allowed by virtue of their dependency.

With respect to claim 11, the prior art does not teach or fairly suggest an apparatus including a reconstruction unit that reconstructs an image of a subject with first and second sub-

sets of projection data from two different heart cycles, the sub-sets corresponding to a same overlapping sub-region of the heart and a similarity measure applied to reconstructed intermediate images generated therefrom is minimized, when taken in combination with the other limitations of the claim. Claims 22-24 are allowed by virtue of their dependency.

With respect to claim 25, the prior art does not teach or fairly suggest a method including the steps of

i) determination of a subregion of the object which is traversed both by beams whose acquisition instants lie in the time interval of the one period and by beams whose acquisition instants lie in the time interval of the other period,

ii) generation of a first intermediate image by reconstruction of the subregion exclusively using measured values whose acquisition instants lie in the time interval of the one period,

iii) generation of a further intermediate image by reconstruction of the subregion exclusively using measured values whose acquisition instants lie in the time interval of the other period,

iv) determination of a similarity value by applying a similarity measure to the first and the further intermediate image,

v) modifying the interval width and/or the interval position of the time interval of the other period, and repetition of the steps iii) to v) until a break-off criterion dependent on the similarity value is satisfied, when taken in combination with the other limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
